“AMBER (“enhAnced Mobile BiomEtRics”) is a Marie Skłodowska-Curie Innovative Training Network addressing a range of current issues facing biometric solutions on mobile devices”

1. Introduction to the project – Professor Richard Guest, Project Lead
2. Cross section of completed projects:
 - Ridvan Salih Kuzu: Multibiometrics architectures and privacy in a mobile environment
 - Anas Husseis: Vulnerability assessment in the use of biometrics in unsupervised environments
 - Barbara Corsetti: Traceable and comparable evaluation methodology for biometric systems usability
3. Question and Answers to the panel
4. Future roadmap of research – Professor Richard Guest

Close

The project has received funding from the European Union’s Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement no. 675087.
